

Real Estate Management Software by iSaaSPro

The Real Estate Management Software by iSaaSPro is a comprehensive cloud-based solution designed to help real estate developers, builders, and property consultants manage their entire business digitally. From property listings and lead tracking to project management, billing, and customer relations — everything is centralized in one smart platform.

Whether you handle residential, commercial, or rental properties, this software ensures seamless control, transparency, and productivity.

Key Features

1. Property Listing & Management

- Add, edit, and manage property details with photos, pricing, and specifications.
- Categorize by property type, location, and project phase.

2. Lead & Customer Relationship Management (CRM)

- Capture leads from your website, social media, or campaigns.
- Automate follow-ups and track every inquiry to conversion.

3. Project Management

- Manage multiple projects with timelines, milestones, and progress tracking.
- Allocate tasks to your sales and site teams easily.

4. Billing & Payment Tracking

- Generate invoices, receipts, and track client payments.
- Supports EMI, installment, and milestone-based payment systems.

5. Inventory & Document Management

- Maintain records of available plots, flats, and sold units.
- Store important client and project documents securely.

6. Agent & Broker Management

- Track agent performance, commissions, and referrals.

7. Analytics & Reporting

- Get detailed insights into leads, revenue, and project progress.
- Export reports for management review.

8. Cloud-Based Access

- Manage your real estate operations anytime, anywhere.
- Works seamlessly on desktop, tablet, and mobile.
