

## Fleet Management Software by iSaaSPro

The Fleet Management Software by iSaaSPro is a smart, cloud-based solution designed to help transport companies, logistics firms, and vehicle owners manage their fleets efficiently. It streamlines vehicle tracking, maintenance scheduling, driver management, fuel monitoring, and trip records — all from a single dashboard.

Whether you manage cars, trucks, buses, or delivery vans, this software ensures better control, cost savings, and operational efficiency.

### Key Features

#### 1. Vehicle Tracking & Monitoring

- Real-time GPS tracking for all vehicles.
- Monitor location, routes, and trip history.

#### 2. Driver & Trip Management

- Assign drivers, create trips, and monitor status.
- Maintain driver performance and attendance records.

#### 3. Fuel & Expense Management

- Record fuel usage, mileage, and fuel cost analytics.
- Track expenses by vehicle and route.

#### 4. Vehicle Maintenance & Service Reminders

- Schedule regular maintenance and get automatic alerts.
- Track service history and spare part replacements.

#### 5. Document & Compliance Management

- Store insurance, RC, permit, and pollution certificate digitally.
- Get alerts before document expiry.

#### 6. Fleet Analytics & Reporting

- View detailed reports on mileage, cost, and utilization.
- Optimize routes and reduce fuel wastage.

#### 7. Role-Based Dashboard

- Separate access for admin, driver, and accountant roles.

#### 8. Cloud & Mobile Access

- Access from anywhere on desktop or mobile devices.
