

Courier Management Software by iSaaSPro

The Courier Management Software by iSaaSPro is an advanced cloud-based solution built to simplify courier, parcel, and logistics operations. It helps manage parcel booking, tracking, delivery, billing, and customer communication all in one place. Ideal for courier agencies, logistics companies, delivery startups, and transport services, this software improves speed, accuracy, and customer satisfaction.

Key Features

1. Parcel Booking & Tracking

- Generate unique tracking IDs for every parcel.
- Real-time tracking with delivery status updates.

2. Pickup & Delivery Management

- Schedule pickups, assign delivery agents, and monitor progress.
- Route optimization for faster delivery.

3. Customer & Vendor Management

- Maintain client and vendor databases with contact history.
- Automated notifications via SMS or email.

4. Billing & Invoicing

- Auto-generate GST-compliant invoices.
- Manage cash, credit, and online payments.

5. Branch & Franchise Management

- Control multiple branches or franchises from one dashboard.
- Real-time data sync across locations.

6. Expense & Inventory Control

- Track operational costs, packaging inventory, and delivery expenses.

7. Reporting & Analytics

- Get reports on parcel status, delivery performance, and payments.

8. Cloud & Mobile Access

- Access your courier operations anywhere, anytime.
