

## E-Store : Quick Commerce Application

(Website & Mobile Application) by Insight Infosystem

The E-Store Quick Commerce Application by Insight Infosystem is a robust, scalable, and user-friendly website and mobile app solution built for businesses that want to deliver products faster, smarter, and digitally. Designed for the modern on-demand economy, E-Store enables hyperlocal and quick delivery of groceries, daily essentials, food items, medicines, and retail products.

With an intuitive user experience, real-time order management, and smart logistics powered by map-based tracking, E-Store allows businesses to launch and scale their own branded quick commerce platform—without depending on third-party marketplaces.

### Key Features

#### Customer App & Website

- Easy product browsing with categories and smart search
- Real-time product availability
- Fast checkout with multiple payment options
- Live order tracking with real-time status updates
- Offers, discounts, and promo codes

### Admin Panel

- Centralized dashboard to manage products, pricing, and inventory
- Complete order lifecycle management
- Customer, store, and delivery partner management
- Sales reports, analytics, and performance insights
- Banner, offer, and promotion management

### Delivery Partner Module

- Live GPS tracking of delivery executives
- Optimized route navigation using Google Maps
- Turn-by-turn directions for pickup and delivery
- Distance and delivery time calculation
- Multiple order and route planning

---

### Store App (Seller / Shop Owner App)

The **Store App** enables shop owners and vendors to manage their entire store operations directly from their mobile phones—without the need for a computer.

### Store App Features

-  Order Management – Accept, reject, or process orders instantly
-  Real-Time Order Updates – Update status like Preparing, Ready for Pickup, or Dispatched
-  Product Management – Add, edit, enable/disable products and manage pricing easily
-  Inventory Control – Real-time stock updates to prevent out-of-stock issues
-  Instant Notifications – Alerts for new orders, cancellations, and updates

- 💰 Earnings & Sales Reports – Track daily, weekly, and monthly performance
  - 🛒 Offers & Availability Control – Manage product availability and promotional offers
  - 👤 Profile & Store Settings – Update store details, timings, address, and branding
- 

## 💰 Payment & Integrations

- UPI, debit/credit cards, net banking, and wallet integration
- Cash on Delivery (COD) option
- SMS, email, and push notification integration

## 🌐 Technology & Platform

- Cloud-based and scalable architecture
- Android, iOS, and responsive web applications
- Secure, high-performance system
- White-label and custom branding support

## 🏪 Ideal For

- Grocery and daily essentials stores
- Hyperlocal retailers
- Pharmacy and medical stores
- Food and beverage outlets
- Local supermarkets and retail chains
- Startups entering the quick commerce space

## 👛 Why Choose Insight Infosystem?

- End-to-end development (Website + Android + iOS)
  - Fully customizable features as per business needs
  - Scalable SaaS or licensed deployment models
  - Reliable technical support and maintenance
  - Trusted IT solutions provider since 2013
-
